

Alpha-H Assists in the Anti-Aging Process with Age Delay Facial Oil

Dramatic cosmetic surgery can seem like the only option for women experiencing premature aging. For those of you who are wary of going under the knife, Alpha-H has a less-drastic, yet equally effective option – formally *Hydra Defense*, now known as the Age Delay Facial Oil, is a core item within the Age Delay family.

“This preventative and corrective solution aims at reducing cellular degeneration, pigmentation and discoloration, dehydration, scarring and fine lines, this formula is a blend of precious oils, to replenish and strengthen skin.” - says Michelle Doherty, Owner and Director Alpha-H.

Alpha-H Age Delay Facial Oil helps repair cell damage while firming, toning and softening skin that's become dry, mature or sun damaged. It deeply hydrates for noticeable results. Age Delay Facial Oil is a synergistic mix that works to slow the ageing process by protecting the skin against free radical damage while repairing and correcting.

“Results are visibly noticeable as the blend of active ingredients in this serum work synergistically together to accelerate the skins function. It's a 'hug in a bottle'!” – says Paula Purser, Education Manager Alpha-H.

Containing Apricot Oil for its protection and softening properties, Rose Hip Oil to repair and strengthen, Wheat Germ to nourish, Calendula to regenerate, Carrot Oil to improve skin texture and maximise moisture levels, Vitamin E, Frankincense for its firming and toning benefits, German Chamomile to soothe, Lavender to heal and Patchouli to aid in repairing cells and balance.
