

Alpha-H Advanced Hydration Cream For all skin types

The Alpha-H Advanced Hydration Cream is an indulgent, velvety cream infused with natural vitamins and bio minerals containing trace elements from the sea - delivering long lasting hydration to the skin.

“This non-glycolic formulation will pamper your skin by increasing moisture retention and restoring elasticity to the skin by oxygenating the skin cells. A luxurious and rich moisturizer ideal for normal or dehydrated skin as well as those prone to Rosacea.” – says Paula Purser, Education Manager Alpha-H.

Alpha-H's Advanced Hydration Cream boasts a delicious recipe of Macadamia Seed Oil, Peppermint, Beta-carotene, Vitamin E, Evening Primrose, Jojoba Seed Oil and Ginseng for instant relief for sensitive, dehydrated, sun damaged or normal skin.

This moisturiser provides key protection from the harsh environmental elements, corrects damage caused by free radicals, is quickly absorbed, and allows the skin to breath while encouraging new skin cell production.

“Alpha-H Advanced Hydration Cream is a great day-to-day cream which will work well in conjunction with your Glycolic products to rehydrate and rejuvenate your needy skin. Apply liberally to cleansed face, neck and décolletage morning and night.” – says Taryn Doherty, Salon Support and Education Alpha-H.

New Skin Begins with Advanced Hydration Cream and Alpha-H.
