

Have Your Fun in the Sun with Ultra '30'

Exposure to the sun is universally recognised by experts as the leading cause of skin damage. However a lazy day at the beach, barbeque with friends or afternoon gardening are some of life's simple pleasures few are willing to give away.

The answer is Alpha-H's Ultra Protector Daily Moisturiser SPF 30+. Ultra '30' works to moisturise as it protects and quenches dry skin with the added bonus of a 30+ sunscreen. Sun care in a skin care regime!

Ultra '30' is a gentle formula designed for daily use, combining Vitamin E and Aloe Vera to soothe skin and Zinc Oxide to reflect the sun's harmful rays protecting the skin from photo-ageing.

Ultra '30' uses Vitamin E, which works as a powerful anti-oxidant, protecting skin from free radical attack and safe-guarding against damage caused by the sun.

Director of Alpha-H, Michelle Doherty, said it was Ultra '30''s versatility that made it such a hit with women of all ages.

"We all know sunscreen is vital to preserve the integrity of skin, but most sunscreens leave us with a dreadful white pasty finish that shows through makeup" – says Michelle Doherty, Owner and Director Alpha-H.

"With Ultra '30' you won't have this problem. It's formulated to be absorbed quickly by the skin leaving a fresh matt finish. Make-up can then be applied within 30 seconds for a flawless finish. The fact that it doubles as an effective moisturiser means all skincare bases are covered."

Carrying approval from the Australian Cancer Society, Ultra '30' features a four hour water resistant formula, suitable for all skin types. It contains no harsh chemicals and won't aggravate acne prone skin.

With Ultra '30' you can once again enjoy the healthy outdoors lifestyle you love; safe in the knowledge your skin has the protection it needs.

New Skin Begins with Ultra Protector Daily Moisturiser SPF 30+ and Alpha-H.
